ABSTRACT

Production logistics is the core and the most important logistics link of manufacturing enterprise logistics. Only by correctly handling the production logistics link, company can promote the efficiency of each link of manufacturing enterprises. So that manufacturing enterprises can get a comprehensive and rapid development. Logistics is an activity connecting the whole production, especially for BOE enterprises with continuous assembly line production mode. Good enterprise production logistics can not only regulate production, but also improve production efficiency and save costs to the greatest extent. For manufacturing enterprises, especially BOE enterprises, the management level of production logistics is the key for enterprises to give full play to production capacity, reduce costs, increase efficiency and improve product market competitiveness. Especially for today's increasingly comprehensive development of production logistics era. In order to remain invincible in this market, we must constantly strengthen the management of production logistics in this fierce competition, in order to improve their own economic strength.

This paper analyzes BOE Optoelectric Co., Ltd, in terms of production logistics, process, material management, and storage. The study found the existence of unreasonable material management, product accumulation, equipment, process problems, unreasonable product placement and execution ability lack, which respectively expounds the expression of the problem and its causes. Furthermore, a series of reasonable improvements are proposed, such as standardizing material management, regular cleaning of existing products, material control, process improvement point, machine and equipment maintenance, standardizing product placement, and strengthening management and improving the execution ability. However, due to the knowledge of production and logistics is not very comprehensive, there are unavoidable omissions in the plain statement.

Keywords: Production logistics, BOE enterprise, Production line
